## APPLICATIONS BUILT

---

VibeLA | **Back End Developer** | <https://shararsh.github.io/Project1>

Working on a team of 4, we built a webapp that allows users to plan out their night in LA. The app was built using Firebase, Bootstrap, and Yelp, Ticketmaster, and Foursquare APIs.

Tropical Flooring Inventory | **Back End Developer** | <https://theinventoryproject.herokuapp.com>

Working on a team of 4, we worked with Tropical Flooring Inc. to build the company a webapp for tracking incoming and outgoing inventory between warehouses. The app was built using Node.js, Express.js, MySQL, EJS, and D3.js.

Arielle Simonee | **Full Stack Developer** | <https://www.iamariellesimonee.com>

My client, Arielle Simonee, requested to completely redo her acting and modeling website. I used Bootstrap, Node.js, Express.js, and EJS.

ScanIT | **Full Stack Mobile App Developer** | <http://github.com/dsimmon1/scanIT>

My partner and I built a companion phone app for Tropical Flooring Inc. that scans barcodes and inputs the data into the database. We built it using React Native, NativeBase, and MySQL.
